Subject: Techalloy, Union, Illinois Water Level Data Collection

Mr. Thorsen,

Give this a try and see if it make a difference for the water level data collection. In light of the recently identified issues with the water level data, EPA recommends that a depth to water measurement be taken at the time the water-level data is downloaded. This level should be reported, and the data from the field measurement and the transducer data should be compared--both the water-level altitude at the time of the measurement as well as the change in altitude from the previous measurement--to help ensure the accuracy of the recorded data.

If you have any questions please contact me.

Respectfully,

John Nordine, CPG, LPG
